PARAFFIN WAX THERAPY DEVICE					
107	Paraffin Wax Therapy Device		XYL-I	Anti-electric leakage function and leakage protection device; nohydration wax technology; automatic temperature control device, keep the temperature at 58°C-60°C; melt wax: 10kg.	
108	Paraffin Wax Therapy Device		XYL-II	Anti-electric leakage function and leakage protection device; nohydration wax technology; automatic temperature control device, keep the temperature at 58°C-60°C; melt wax: 30 kg.	
109	Paraffin Wax Therapy Device		XYL-V	Anti-electric leakage function and leakage protection device; nohydration wax technology; automatic temperature control device, keep the temperature at 58°C-60°C; melt wax: 30kg.	
110	Paraffin Wax Therapy Device		XYL-VIIA XYL-VIIC	The newly upgraded intelligent control, advanced and very user-friendly functions such as voice broadcast, power-off memory, intelligent ultraviolet disinfection, and automatic switching of wax making procedures; Three cake making modes: Normal wax making, rapid wax making, and reservation wax making to meet the needs of different situations; 5 electrical safety protection functions, overheating protection, current overload protection, fault self-checking alarm and other functions; ergonomic design, frosted stainless steel oversized worktable; with various wax plates, to make various sizes of wax cakes. Wax cake can be up to 12-36 layers, and a maximum of 28-84 wax cakes can be produced.	
111	Paraffin Wax Therapy Device		XYL-VIID XYL-VIIF		
112	Operating Table		XY-LF-I		
STEAM THERAPY DEVICE					
113	Steam Therapy Device		HYZ-IIA	Microcomputer control operating system, digital display window; with timing, automatic temperature control, automatic leakage protection, automatic anti-dry, ozone disinfection function; foot massage and Chinese medicine liquid atomization function, which can be used for whole body fumigation and reproductive system fumigation.
